5 years of experience in **data science and analytics** with strong communication skills, including presenting to C-level executives. Proven ability to deliver high-impact solutions while continuously advancing my technical expertise and professional development.

EDUCATION

University of Texas at Arlington	Texas, USA
Master's in data science. (4.0 GPA)	August 2024 – May 2026
Courses: Bioinformatics, Computer Vision, Project Management, Deep Learning, Probability	
NIIT University	India
Bachelor's in computer science and engineering.	August 2018 – May 2022
Courses: Artificial Intelligence, Machine Learning, Computer Vision, Natural Language Processing	

SKILLS

Python | R | SQL | Databricks | MS Excel | Adobe Analytics | Google Analytics | AWS | Domo | Agentuuty | Tableau | NetSuite | Power BI | Sigma | Netspring | Alteryx | Statsig | Image Processing | NLP | Product Analytics | Forecasting | A/B Testing | Data Validations

WORK EXPERIENCE

Euclod Data Solutions Pvt. Ltd	India
Product Analyst Client: eCommerce (subscription-based)	November 2023 – July 2024
- Orchestrated A/B testing across five product lines, yielding a 13% uplift in the North Star metric; found critical improvements in user onboarding and feature discovery within the application. - Crafted insightful dashboards using Domo, SQL, and Python to monitor KPIs, enabling proactive decision-making and reducing data-to-insight time by 40% - Enhanced the homepage experience by identifying and eliminating friction points, leading to a 25% increase in user engagement and a 15% improvement in conversion rates	
Data Scientist Client: Insurance Agency	April 2023 – October 2023
- Automated data extraction and validation of financial documents and loss run (PDF, Image) using Computer Vision and Document AI, cutting reconciliation costs by 80%. - Built data pipelines that reduced manual reconciliation by 30%, enabling faster posting validation and ledger accuracy - Trained analysts and interns on SQL-based financial data checks, improving team accuracy and reducing calculation error by 90%.	
CX Analyst Client: B2B Fortune-100 electronics manufacturer	July 2022 – March 2023
- Designed and activated retargeting campaigns, driving a 15% uplift in web traffic through data-driven strategies and marketing - Optimized customer experiences using web Analytics and analyzing friction points which led to a 10% increase in conversion rate - Conducted A/B tests which improved add-to-cart rate by 10% through data-backed recommendations and strategies - Supported finance teams by producing monthly revenue performance dashboards, Conducted SQL-based reconciliations and cohort analyses to validate marketing spend against actual revenue impact.	
CX Analyst Intern Client: B2B Fortune-100 electronics manufacturer	January 2022 – June 2022
- Executed three distinct A/B tests, resulting in a measurable 20% improvement in open rates, enhancing customer engagement and optimizing campaign performance. - Analyzed transaction-level data to reconcile campaign performance with billing reports, improving accuracy of client invoicing by 15%. - Developed forecasting model for marketing metric, enabling leadership to anticipate trends and adjust strategies proactively.	

PROJECTS

AI/ML (Skills: FastAPI, React, LLM Integration, Event Tracking Architecture, Behavioral Analytics, System Design)	January 2026 – Present
Built an AI-assisted interview platform for data roles that evaluates candidates through real-world SQL tasks while tracking their problem-solving approach, AI usage, and analytical thinking in a live sandbox.	
Scot Forge Project (Capstone Project) (Skills: Time-series Forecasting)	January 2026 – Present
Developing time-series forecasting models to predict gas usage for America's leading forging organization	
Webverse (Skills: Java Script, Agentuuty, Nano-Banana, Auth0, Art)	September 2025 – December 2024
AI-driven webcomic generator with Writer, Illustrator, and Image Generator agents using Gemini Nano for dynamic storytelling and Nano Banana for real-time image creation based on user choices.	
Guess the Elo! (Skills: transformer, tensorflow, statistical analysis, data cleaning, parallel processing)	January 2025 – April 2025
Predicting performance of a chess player using encoder-only transformer architecture combined with dense layer for scalar features.	
Meoww (Skills: signal processing, pytorch, midi processing, voice modulation, pitch modulation)	October 2024 – November 2024
A fun audio-mixing algorithm that sneakily replaces the vocals of a song with a cat's meow, because every hit song deserves a feline remix!	
Lumen AI (Skills: OCR, vision transformer, data cleaning, fuzzy logic, VQA, GPT)	April 2023 – October 2023
Designed and implemented an end-to-end automated document processing system , eliminating the need for manual intervention and enabling seamless insight generation.
